Practical no. 4B

Aim: Create an ASP.NET Web Forms application using simple server controls.
b. Create a Registration form to demonstrate use of various Validation controls.

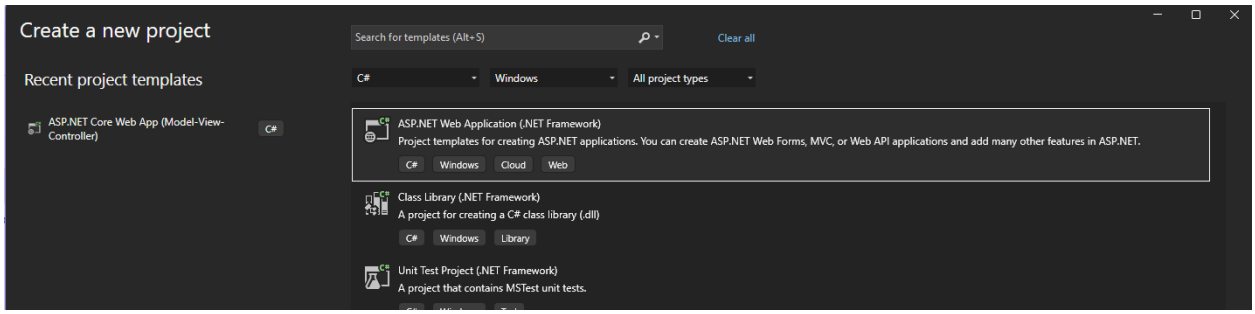

Software Required:

Visual Studio 2022

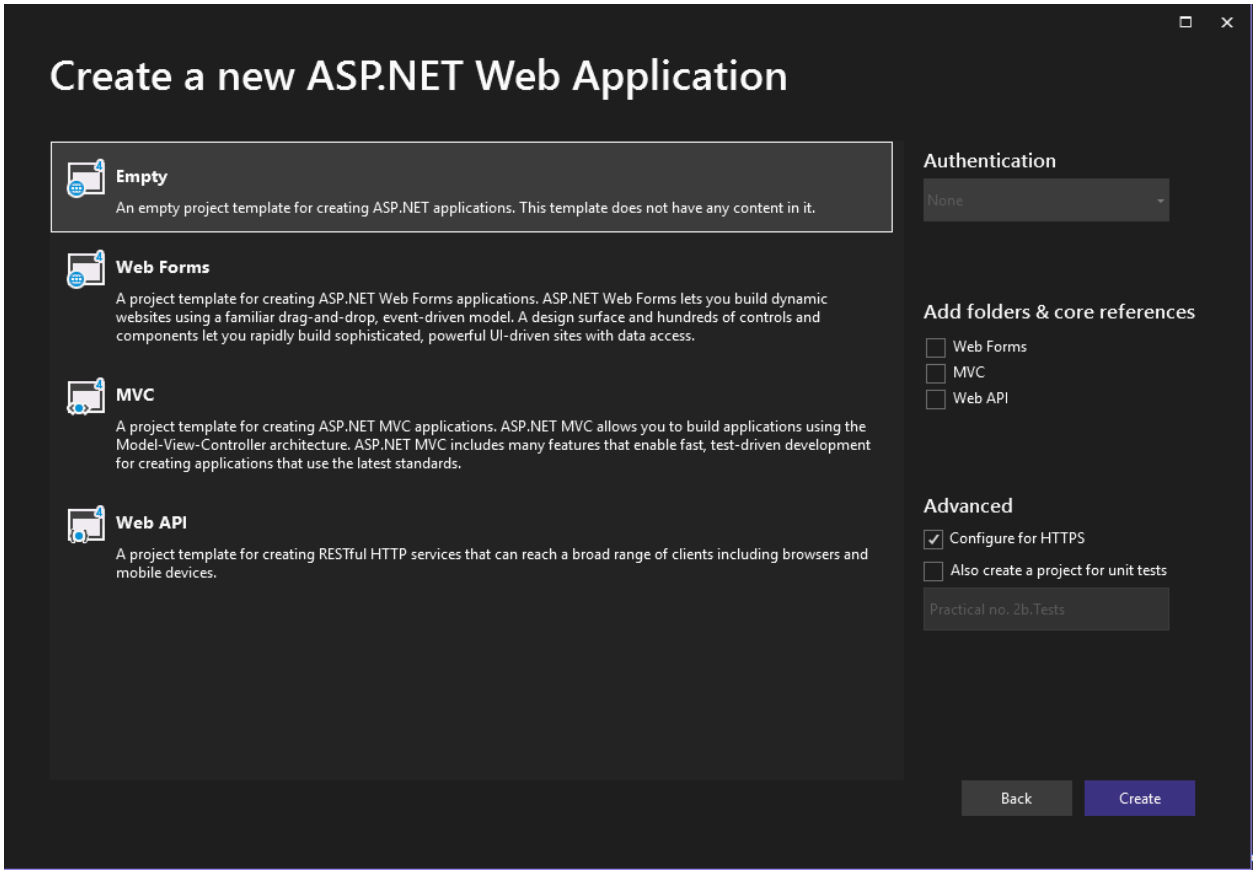

Procedure:

Step 1: Create New Project

1. Open Visual Studio.
2. Click **Create a new project**.
3. Select **ASP.NET Web Application (.NET Framework)**.

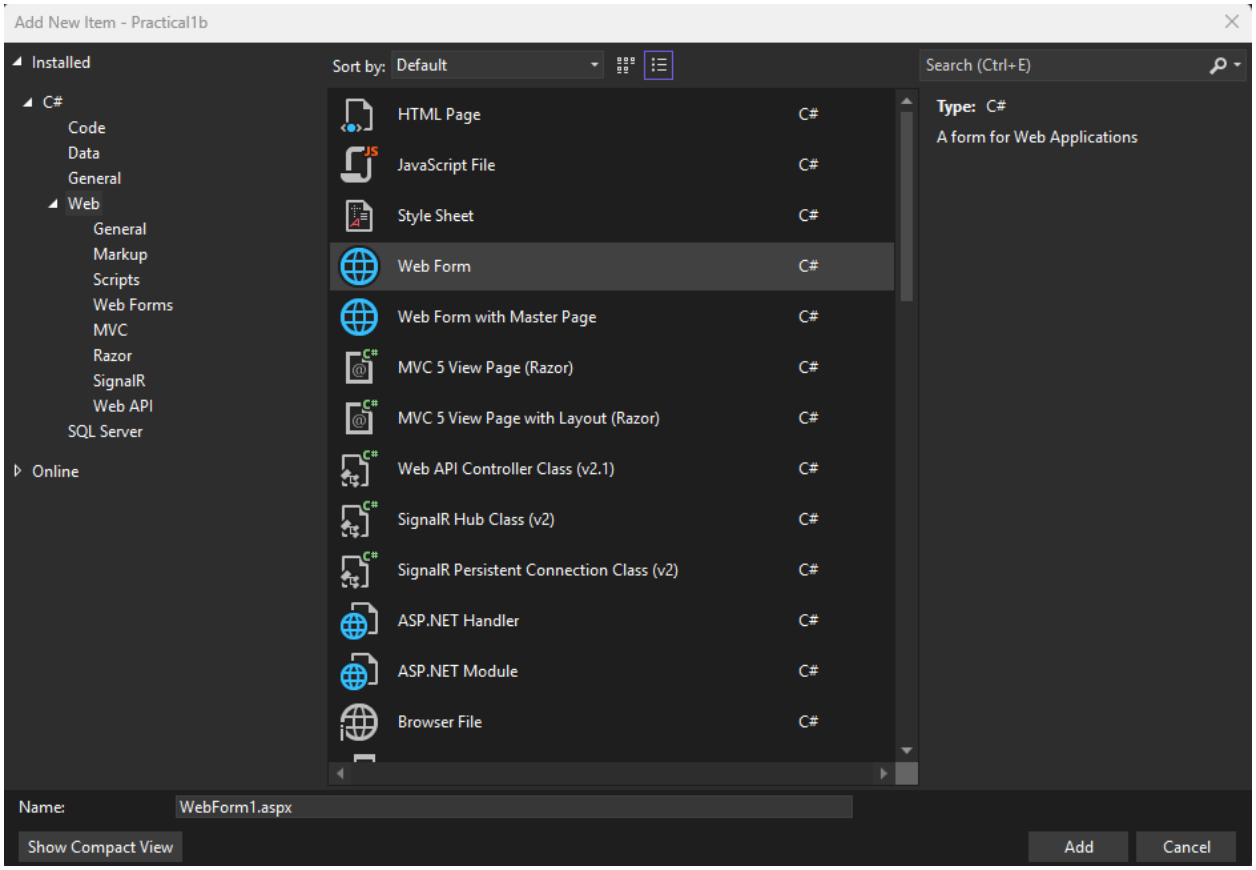

4. Click **Next**.
5. Enter Project Name: **Practical3**
6. Click **Create**.
7. Select **Empty**.

8. Click **Create**.

Step 2: Add a Web Form

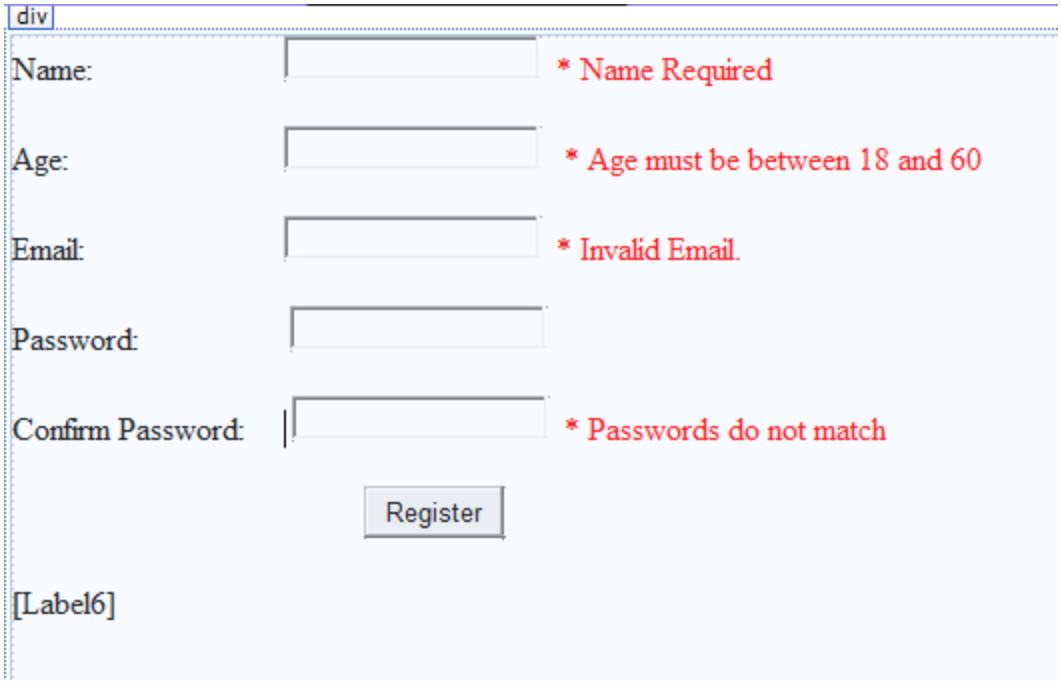

1. In Solution Explorer, right-click the project **Practical4B.**
2. Select Add → New Item.
3. Select Web Form.
4. Click **Add**.

Step 3: Design Web Form

Open **WebForm1.aspx** and add the following controls:

1. TextBox
2. Button
3. Label
4. RequiredFieldValidator
5. RangeValidator
6. RegularExpressionValidator
7. CompareValidator

Step 4: Write C# Code

Open **WebForm1.aspx.cs** and write the following code.

WebForm1.aspx.cs

```
using System;
using System.Collections.Generic;
using System.Linq;
using System.Web;
using System.Web.UI;
using System.Web.UI.WebControls;

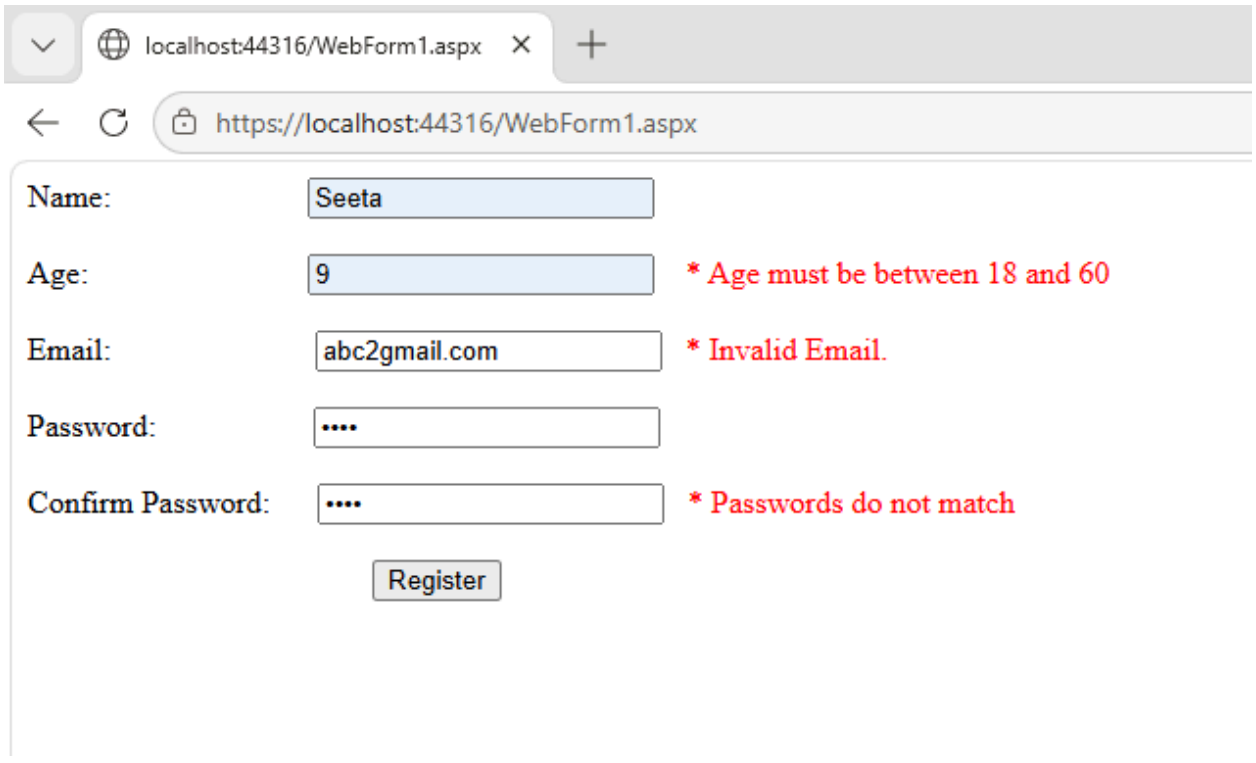

namespace Ptactical_4b
{
   public partial class WebForm1 : System.Web.UI.Page
   {
      protected void Page_Load(object sender, EventArgs e)
      {
         ValidationSettings.UnobtrusiveValidationMode =
           UnobtrusiveValidationMode.None;
      }

      protected void Button1_Click(object sender, EventArgs e)
      {
```

```
        if (Page.IsValid)
        {
          Label6.Text =
           "Registration Successful!";
        }
      }
    }
}
```

Step 5: Run the Application

1. Save all files.
2. Press **Ctrl + F5**.
3. Leave fields blank or enter invalid values.
4. Click **Register**.
5. Validation messages will appear.
6. Enter correct values and click **Register**.
7. Registration Successful message will be displayed.
