Practical no. 8A

Aim: Create an HTML page that would be the starting point of the application. This HTML will contain a link to the file named manifest.json. This is an important file that would be created in the next step.

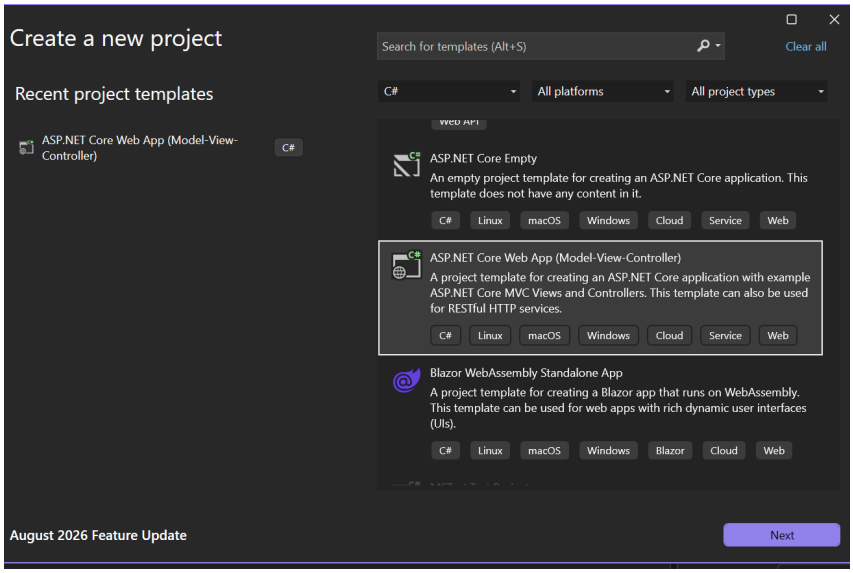

Software Required:

Visual Studio 2026

Procedure:

STEP 1: CREATE NEW PROJECT

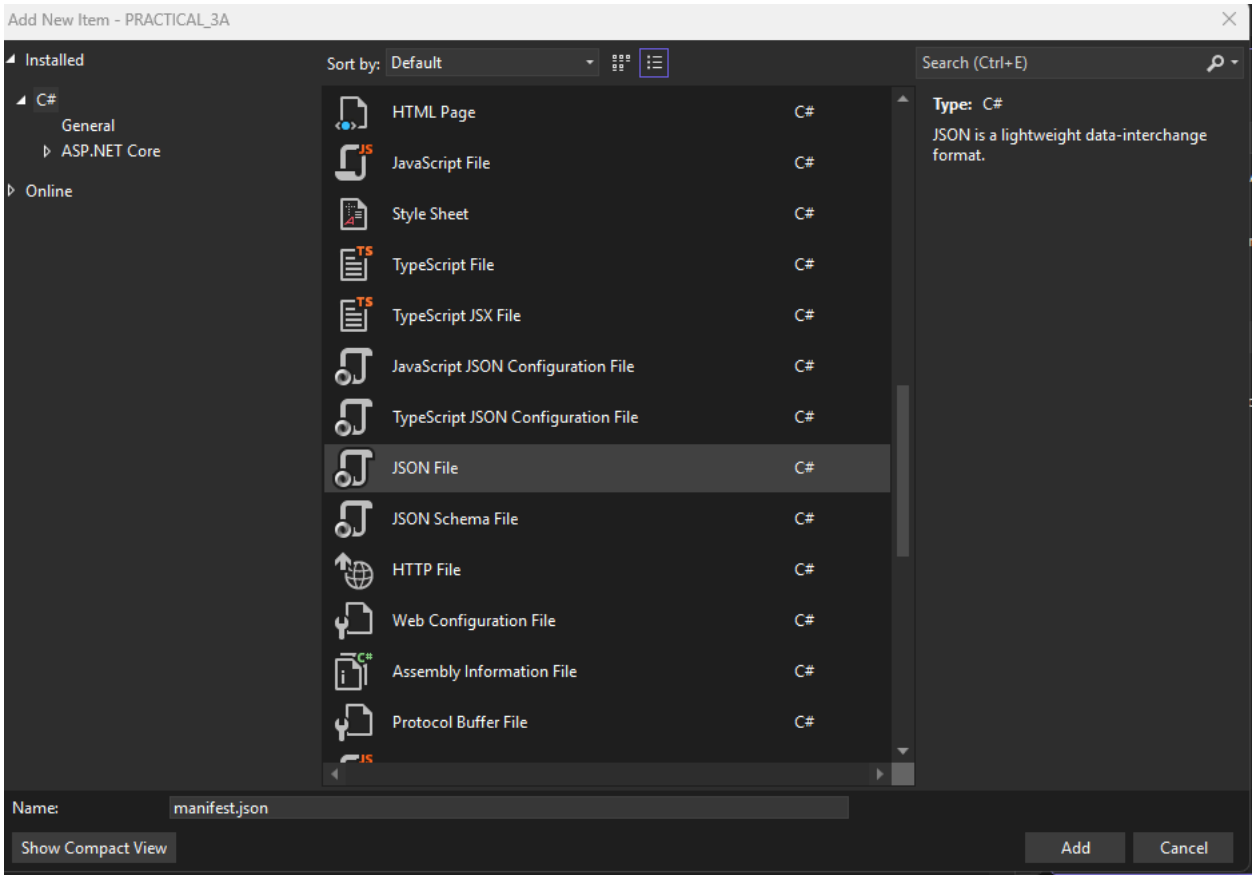

1. Open Visual Studio 2026.
2. Click: Create a New Project
3. Open Visual Studio 2026.
4. Select Create a new project.
5. Search for ASP.NET Core Web App (Model-View-Controller).
6. Click Next.
7. Set the Project Name to Practical No. 6b.
8. Select a suitable location and click Next.
9. Select the installed/latest .NET version and keep the default options.
10. Click Create.

Step 5: Create Manifest File

1. Right Click → **wwwroot** folder
2. Click Add → New item

3. Select JSON file.
4. Enter File Name: **manifest.json**
5. Click Add.

Write the following code in the manifest.json file.

manifest.json

```
{
 "name": "My First PWA",
 "short_name": "MyPWA",
 "start_url": "/",
 "display": "standalone",
 "background_color": "#ffffff",
 "theme_color": "#007bff"
}
```

STEP 3: CREATE HOME PAGE

Open Views → Home → Index.cshtml and replace its contents with:

```
@{
    Layout = null;
}

<!DOCTYPE html>
<html>
<head>
    <meta charset="utf-8" />

    <title>My First PWA</title>
    <link rel="manifest" href="/manifest.json" />

</head>

<body>

    <h1>Welcome to My First PWA</h1>

    <p>This is the starting page of my Progressive Web Application.</p>

</body>
</html>
```

Step 4: Run the Application
Ctrl + F5

Step 5: Verify Manifest File

1. Press: F12
2. Open: Application → Manifest

You should see:

1. Application Name
2. Short Name
3. Theme Color
4. Background color
5. Display Mode
